[Abstract:](#)

The health brassiere with new structure consists of brassiere base cloth, shoulder bands, braces and fastener. The inner and/or outer sides of the brassiere base cloth has painted foamed composite layer and the inner side has one guiding lining cloth layer. The composite layer contains also biogene, far infrared ceramic powder, foaming slurry, color fixing agent, urea water, pigment, etc. The composite layer adhered to the base cloth has the functions of promoting metabolism, delaying senility and improving body's microcirculation. The brassiere is light and may be washed without effect on its medical function.
